## Syntax Highlighting

```clojure
(def xf (comp (filter odd?) (map
inc)))
.

# GitLab Markdown Cheat Sheet

by superstructor via cheatography.com/54103/cs/14533/

## Math with KaTeX

```
This math is inline a^2+b^2=c^2. This is on a separate line math a^2+b^2=c^2.
```

## Diagrams & Flowcharts

```
```mermaid
graph TD;
    A-- >B;
    A-- >C;
    B-- >D;
    C-- >D;
``
```

Refer to the Mermaid Cheat Sheet.

#### Headers

```
# H1
## H2
### H3
#### H4
##### H5
###### H6
Altern ati vely, for H1 and H2,
an underl ine-ish style:
Alt-H1
=====
Alt-H2
```

## **Header IDs & Links**

All headers automatically get IDs, except in comments.

IDs are generated from header content as follows:

- 1. All text is converted to lowercase
- 2. All non-word text is removed
- 3. All spaces are converted to hyphens
- 4. Two or more hyphens in a row are converted to one
- 5. Emojis are removed
- 6. Duplicate headers have a unique incrementing number appended.

## **Emphasis**

```
Emphasis, aka italics, with *asterisks* or _underscores_.
Strong emphasis, aka bold, with asterisks or _underscores_.
Combined emphasis with asterisks and _under scores_.
Strike through uses two tildes.
Scratch this.
```
