Header IDs & Links

All headers automatically get IDs, except in comments.

IDs are generated from header content as follows:

1. All text is converted to lowercase
2. All non-word text is removed
3. All spaces are converted to hyphens
4. Two or more hyphens in a row are converted to one
5. Emojis are removed
6. Duplicate headers have a unique incrementing number appended.

Emphasis

Emphasis, aka italics, with *asterisks* or *underscores*.
Strong emphasis, aka bold, with **asterisks** or **underscores**.
Combined emphasis with ***asterisks and underscores***.
Strike through uses two tildes.
