

### Baddeley and Hitch

Created the working memory model

### Goodwin et al.

indirect cues - state dependant forgetting (drunk and sober)

### Goodwin et al.

indirect cues - state dependant forgetting (drunk and sober)

### Goodwin et al.

indirect cues - state dependant forgetting (drunk and sober)

### Godden & Baddeley

indirect cues research - context dependant forgetting (on land and underwater conditions)

### Danaher et al.

suggested running multiple exposures of an advertisement in one day rather than in a week to reduce interference

### Postman

research on retroactive interference - two word pair lists

### Underwood

research on proactive interference - meta anlysis

### Clive Wearing

Brain damaged patient who damaged his episodic memory. - AO3

### Tulving et al.

Created the different types of long term memory

encoding specificity principal - cues must be there at time of encoding and retrieval

### Logie

Subdivided the visuo-spatial sketchpad into separate stores

### Peterson & Peterson

Duration Short Term Memory - consonant syllable

### Patient EVR

Brain damaged patient who had a cerebral tumor removed - AO3

### patient HM

brain damaged patient who had their hippocampus removed - AO3

### Atkinson and Shiffrin

Created the multi store model of memory

### Bandimote et al.

Coding - short term memory - STM isn't only encoded acoustically but also visually - AO3

### Jacobs

capacity - short term memory - word list add word if pt got it right

### Miller

Capacity - short term memory -  $7 \pm 2$

### Bahrck

Duration - short term memory - high school year books

### Cowan

Capacity - short term memory - capacity of STM is four chunks - AO3

### Baddeley

Coding - short term memory and long term memory - semantically and acoustically similar word lists
