

Inventor

The XinFin - XDC Network was not Invented by a Single Individual but rather Developed by a Team of Blockchain Enthusiasts and Developers. The core Team behind XinFin includes individuals such as Ritesh Kakkad, Atul Khekade and Fisher Yu

XDC Network Protection

XinFin Delegated Proof of Stake:

- XDPOS consensus improves efficiency & energy consumption by ensuring fast transactions & scalability with trusted delegates.
- Randomly chosen validators promote decentralization and prevent power concentration.
- XDC Network uses double validation, enhancing security and mitigating malicious activities through consensus from multiple validators.
- Block proposal & verification is rewarded with XDC (Staking rewards)
