Ruby/Rails/Tools

Open model `foo`	:Emodel foo
Open controller `foo`	:EController foo
Open model `foo` in hsplit	:Smodel foo
Open controller `foo` in vsplit	:Vcontroller foo
Open alternate file	:A
Open related file	:R
Open Rails console	:Rails console
Run current spec file	,t
Run nearest spec	,s
Run last spec	,l
Git blame	:Gblame

File Navigation

NERDTree	F5
Open	o
Open in vsplit	s
Open in hsplit	i
Find file in tree	,v
Toggle hidden files	I
Modify node	m
Find fuzzy file	,cp
ctrlp Open in vsplit	Ctrl+V
ctrlp Open in hsplit	CTRL+X
Search string	:Ack! s
Open	o
Open in vsplit	v
Open in hsplit	h
Edit previous buffer	,z
Edit next buffer	,x
Swap between last edited buffers	,,

Text manipulation

Interpolate Ruby String	,#
Surround with "	,"
Surround wuth '	,'
Surround with ()	,(
Surround with []	,[
Surround with {}	,{
Change inside ""	ci"
Change inside ()	ci(
Change inside {}	ci{
Change inside []	ci[
Replace line from cursor	C
Insert at end of line	A
Insert at beginning of line	I
Insert line below cursor	o
Insert line above cursor	O
Join line with below	J
Change delimiter quotes from " to '	cs"'
Delete delimiter quotes	ds"
Comment out a line	gcc
Comment a selection	gc

Motion

Yank inside delimiter (e.g. {})	yi{
Yank around delimiter (e.g. {})	ya{
Mark position as 'a'	ma
Yank to mark 'a'	y'a
Yank inner method	yim
Yank around method	yam

Code navigation

Go to method definition	,f
Go to method definition in a vsplit	,F
Go to matching brace	%
Auto Complete	Ctrl+N
First character of line	0
End of line	$

Code navigation (cont)

Word Forward	w
Word Backward	b
Page forward	Ctrl+f
Page backwards	Ctrl+b
Next/Previous method	]m / [m
End of method definition	]M / [M
Next/Previous class/module	]] / [[

Search and replace

Search forward	/<pattern>
Search backwards	?<pattern>
Jump to next match	n
Jump to previous match	N
Replace `old` with `new` in `range`	:<range>s/<old>/<new>/[g,i,I,c]
Search forward for word under cursor	*
Search backward for word under cursor	#
Grep word under cursor	K
Remove search highlight	//

Misc

New vsplit	vv
New hsplit	ss
Move to split	Ctrl+W,l/r/u/d
Undo	u
Redo	Ctrl+r
Repeat	.
List buffers	:ls
