

### Core Navigation

|                          |                               |
|--------------------------|-------------------------------|
| <code>&lt;C-f&gt;</code> | Forward (Page down)           |
| <code>&lt;C-d&gt;</code> | Move down (Half a page)       |
| <code>&lt;C-b&gt;</code> | Backward (Page up)            |
| <code>&lt;C-u&gt;</code> | Move up (Half a page)         |
| <code>&lt;C-o&gt;</code> | Jump back                     |
| <code>&lt;C-i&gt;</code> | Jump forward                  |
| <code>gg</code>          | Go to first line              |
| <code>Shift-G</code>     | Go to last line               |
| <code>:10, 10gg</code>   | Jump to line# 10              |
| <code>10j</code>         | (Relative) Jump down 10 lines |
| <code>10k</code>         | (Relative) Jump up 10 lines   |
| <code>J</code>           | Join lines                    |

### UI/UX

|                               |                           |
|-------------------------------|---------------------------|
| <code>&lt;leader&gt;uC</code> | Colorscheme with preview  |
| <code>&lt;leader&gt;uD</code> | Enable code block dimming |
| <code>&lt;leader&gt;ul</code> | Toggle line number        |
| <code>&lt;leader&gt;uL</code> | Toggle relative number    |
| <code>&lt;leader&gt;uw</code> | Toggle word wrap          |
| <code>&lt;C- &gt;</code>      | Toggle Terminal window    |
| <code>:Neotree</code>         | Neotree file explorer     |

### Buffer Management

|                                    |                      |
|------------------------------------|----------------------|
| <code>&lt;leader&gt;fb</code>      | List open buffers    |
| <code>&lt;Shift&gt; /h</code>      | Next/Prev buffer     |
| <code>]b</code> or <code>[b</code> | Next/Prev buffer     |
| <code>&lt;leader&gt;bd</code>      | Close current buffer |
| <code>&lt;C-w&gt;v</code>          | Split vertical       |
| <code>&lt;C-w&gt;s</code>          | Split horizontal     |
| <code>&lt;C-w&gt;h/j/k/l</code>    | Navigate splits      |

### Text Objects

|                  |                           |
|------------------|---------------------------|
| <code>viw</code> | Select inner word         |
| <code>vi"</code> | Select inner quotes       |
| <code>vi{</code> | Select inner curly braces |
| <code>vip</code> | Select inner paragraph    |
| <code>va[</code> | Select around [] braces   |
| <code>dap</code> | Delete around paragraph   |

### Code Folding

|                                    |                               |
|------------------------------------|-------------------------------|
| <code>zR</code> or <code>zi</code> | Open all folds                |
| <code>zM</code>                    | Close all folds               |
| <code>za</code>                    | Toggle fold                   |
| <code>zA</code>                    | Toggle all folds under cursor |
| <code>zc</code>                    | Close fold                    |
| <code>zo</code>                    | Open fold                     |
| <code>zO</code>                    | Open all folds under cursor   |

### Marks & Bookmarks

|                               |                            |
|-------------------------------|----------------------------|
| <code>&lt;leader&gt;sm</code> | View all marks             |
| <code>m[a-z]</code>           | Set local mark             |
| <code>'[a-z]</code>           | Jump to mark               |
| <code>''</code>               | Jump to last position      |
| <code>`[a-z]</code>           | Jump to exact position     |
| <code>:delmarks a-z</code>    | Del lowercase marks (a-z)  |
| <code>:delmarks ax</code>     | Del "a" and "x" marks      |
| <code>:delmarks!</code>       | Del marks (except A-Z,0-9) |

### Functions & Symbols (LSP)

|                                    |                           |
|------------------------------------|---------------------------|
| <code>:LspInfo</code>              | Show attached LSP info    |
| <code>&lt;leader&gt;cs</code>      | Document symbols          |
| <code>gr</code>                    | Find all references       |
| <code>gd</code>                    | Go to definition          |
| <code>gD</code>                    | Go to declaration         |
| <code>gy</code>                    | Goto Type definition      |
| <code>K</code>                     | Show docstring/type hints |
| <code>[[</code> or <code>]]</code> | Prev/Next reference       |

### Diagnostics

|                               |                       |
|-------------------------------|-----------------------|
| <code>]d</code>               | Next diagnostic       |
| <code>[d</code>               | Prev diagnostic       |
| <code>&lt;leader&gt;sd</code> | Document diagnostics  |
| <code>&lt;leader&gt;sD</code> | Workspace diagnostics |

### Code Actions

|                               |                |
|-------------------------------|----------------|
| <code>&lt;leader&gt;cr</code> | Rename symbols |
| <code>&lt;leader&gt;cf</code> | Format code    |
| <code>&lt;leader&gt;ca</code> | Code actions   |

### Indentation

|                   |                             |
|-------------------|-----------------------------|
| <code>&gt;</code> | Indent right                |
| <code>&lt;</code> | Indent left                 |
| <code>=</code>    | Auto-indent as per language |
| <code>=ip</code>  | Indent current paragraph    |
| <code>gg=G</code> | Auto-indent entire file     |

### Search

|                               |                          |
|-------------------------------|--------------------------|
| <code>&lt;leader&gt;sr</code> | Search and Replace       |
| <code>&lt;leader&gt;fc</code> | Find Config files        |
| <code>&lt;leader&gt;ff</code> | Find files (Root dir)    |
| <code>&lt;leader&gt;/</code>  | Grep (Root dir)          |
| <code>&lt;leader&gt;sG</code> | Grep (CWD)               |
| <code>&lt;leader&gt;ss</code> | Symbol search            |
| <code>&lt;leader&gt;sc</code> | Command history          |
| <code>&lt;leader&gt;sw</code> | Search word under cursor |
| <code>&lt;leader&gt;sk</code> | Search all keymaps       |
| <code>&lt;leader&gt;st</code> | Search TODO WARNING      |

### Git (fzf-lua)

|                               |                         |
|-------------------------------|-------------------------|
| <code>&lt;leader&gt;gc</code> | Commit log texts search |
| <code>&lt;leader&gt;gs</code> | Status (file search)    |
| <code>&lt;leader&gt;ge</code> | Git explorer (Neotree)  |
| <code>&lt;leader&gt;gf</code> | Current file history    |

### LazyGit

|                               |                        |
|-------------------------------|------------------------|
| <code>&lt;leader&gt;gg</code> | Open LazyGit window    |
| <code>&lt;C-r&gt;</code>      | Switch to recent repo  |
| <code>&lt;C-b&gt;</code>      | Filter files by status |
| <code>p</code>                | Git pull               |
| <code>P</code>                | Git push               |
| <code>&lt;space&gt;</code>    | Stage                  |
| <code>a</code>                | Stage all              |
| <code>c</code>                | Commit                 |
| <code>s</code>                | Stash                  |
| <code>z</code>                | Undo                   |
| <code>&lt;C-z&gt;</code>      | Redo                   |
| <code>i</code>                | Add to .gitignore      |
| <code>q</code>                | Quit                   |
