Kanban Bash Cheat Sheet

by TME520 (TME520) via cheatography.com/20978/cs/41946/

Install

```
curl -LO "https://raw.githubusercontent.com/coderofsalvation/kanban.bash/master/kanban"
chmod 755 ./kanban
./kanban init
```

Configuration

- Config file: *.kanban/.kanban.conf*

That file and the *.kanban* folder are created in your local directory when you run *kanban init*.

- Board size: The board resizes automatically according to terminal width.

The terminal size from which Kanban Bash switches to its Small Size display is configured in file *.kanban/.kanban.conf*

Look for *XSMALL=*

- Columns / Statuses: They can be configured easily in the file *.kanban/.kanban.conf*

Look for *statuses=*

Advice: Use single-word statuses names in order to improve readability.

Daily usage

Create new card	kanban add
List cards	kanban list
Read board	kanban show
