

React Compiler - memo

useMemo	auto
useCallback	auto
memo	auto

You no longer need to do these manually

React Compiler - lazy

React.lazy	Suspense
useMemo	Suspense
useCallback	Suspense
useContext	Suspense

by React Suspense Compiler (RSC)

use()

use(context) instead of useContext()

use()

use(c instead of useContext() -- useContext must be called at the top of the component)

```
use(pr 'use client'; import { use } from 'react';
omise) }</ p>; }
```

return value of the context
