

### React Compiler - memo

useMemo	auto
useCallback	auto
memo	auto

You no longer need to do these manually

### React Compiler - lazy

React.lazy	Suspense
useMemo	Suspense
useCallback	Suspense
useContext	Suspense

by React Suspense Compiler (RSC)

### use()

use(context) instead of useContext()

### use()

use(c instead of useContext() -- useContext must be called at the to  
ontext)

```
use(pr 'use client'; import { use } from 'react';  
omise) }</ p>; }
```

return value of the context
