

### CTRL+SHIFT+F

Format selected block source code

If you select the whole of source code and execute the hotkey, the conflict may occur with other teammates source code.

### CTRL+SHIFT+R

Search all file in your Eclipse workspace, it not include archived resource such as a class file.

Using '\*' to replace any character or words you forgot.

Eg: Accn\*Test.java

### CTRL+SHIFT+T

Search any classes, enums, interfaces, This search included all class has archived such as *jar, war, ear, etc..*

You can replace missing word/character by using '\*'
