

phases of cardiac rehab - inpatient				stages of activity levels 1-3 (cont)					stages of activity levels 1-3 (cont)				
met	precau- tions	activities	monitoring	I	1- 1.4	Sitting up is allowed for short periods. Self-f- eeding, washing hands and face, bed mobility, transfers.	Sitting: Reading, radio, non-co- mpetitive table games, light handwork.	Can exercisell all extremities in supine (10- 15x, at a time). Can only sit to exercise neck and lower extremities.	II	2.0- 3.0	Sitting: Showering in warm water. Sitting: Ironing, housek- eeping tasks with brief standing periods to transfer light items.	Sitting: card playing, crafts, piano, machine sewing, typing.	Sitting: wheelcha mobility limited distances Standing: AROM exercises to all extrem- ities, progre- ssively increasing number o reps. May include: balance exercises light mat work with no resistance Walking on a zero gradient and comfor- table pace is allowec
begins at met levels 1-2 target level is 3.5	No isometric exercises or muscle streng- thening work No overhead or lateral upper body activity No exercise if person has the following conditions: unstable angina, uncont- rolled arrhyt- hmia, acute myocardial infarction (heart attack), deep vein thrombosis (DVT), or severe aortic stenosis	Patient education in the following areas: • Energy conser- vation • Work simplific- ation • Risk factors • Smoking cessation Light activity if regular pulse is 100 bpm or less	Take vital signs (blood pressure, pulse, respir- ation) at the beginning of each activity, at the peak of each activity, at the end of each activity, and 4-5 minutes after each activity.		II	1.4- 2.0	Sitting up is allowed as tolerated – no limitations to sitting. Sitting: Self-b- athing, shaving, dressing, grooming.	Sitting: Crafts, painting, knitting, sewing, mosaics, embroi- dery.	May exercise all extremities but NO ISOMETRICS or streng- thening exercises are allowed. AROM to all extremities, progressively increasing number of repetitions. Walking at slow pace in room, as tolerated
