

Identification Parameters

Parameter	Description
ID	Unique ID of the character (Player, NPC, Monster, Pet, etc)
Note	This is shared with [MonsterParam] , [BossParam] (?) & [ItemParams] , meaning you cannot have a duplicate/conflicting ID in these 2 table groups in order to utilize this specific table (AKA: you can't use 1111 for an ID if 1111 is already assigned a sprint in [ItemParam] or a Monster in [MonsterParam])
CommonName	Self-explaintory; name to display
CommonName_Eng	Localization notes (can be ignored)

Image Parameters

Parameter	Description
FileName	Path to the file to use
<i>Example</i>	<code>data\monster\mon154.nri</code>
Note	Pets only use up until this field, really--no others
PartName	Used for the playable characters (can be ignored)
Note	Reference for the files to use for fashion/wedding stuff
IllustName	Path to the "illu" file to use (for NPCs and wedding stuff)
<i>Example</i>	<code>data\npc\npc327_illu.nri</code>

Movement, Size, and Attack Parameters

Parameter	Description
WalkSpeed	Not used here (can be ignored)
SizeOnStop	Hitbox size while standing
Note	NPCs are set at 2
SizeOnMove	Hitbox size while moving
RunSpeed	Not used here (can be ignored)
MinAtkRange	Minimum attack range distance
MaxAtkRange	Maximum attack range distance
ChaseRange	Range to chase the target (for aggressive monsters)

Remaining Misc Parameters

Parameter	Description
PivotFileName	Used for players/wedding (can be ignored)
TransRate	Transparency rate to apply
Note	Appears to be a value between 0-99? Possibly 100; but I don't know why you'd want to do that...
HideShadow	Self-explanatory; enable or disable shadow effect
0	Disable (No shadow)
1	Enable (Yes shadow)
DrawScale	Sprite size to scale (only tested with a monster value)
0	Default
200	Double size? Scaled by 200px?
Note	Not certain which; requires more testing
