## Algebra II Final

Double Angle Identities
33. $\sin \left(\frac{\theta}{2}\right)= \pm \sqrt{\frac{1-\cos \theta}{2}} \quad \sin ^{2} \theta=\frac{1-\cos 2 \theta}{2}$
34. $\cos \left(\frac{\theta}{2}\right)= \pm \sqrt{\frac{1+\cos \theta}{2}} \quad \cos ^{2} \theta=\frac{1+\cos 2 \theta}{2}$
35. $\tan \left(\frac{\theta}{2}\right)= \pm \sqrt{\frac{1-\cos \theta}{1+\cos \theta}} \quad \tan \left(\frac{\theta}{2}\right)=\frac{1-\cos \theta}{\sin \theta}=\frac{\sin \theta}{1+\cos \theta}$

## Halif- Angle Identities

$$
\begin{aligned}
& \sin \left(\frac{a}{2}\right)= \pm \sqrt{\frac{(1-\cos a)}{2}} \\
& \cos \left(\frac{a}{2}\right)= \pm \sqrt{\frac{(1+\cos a)}{2}} \\
& \tan \left(\frac{a}{2}\right)=\frac{1-\cos a}{\sin a}=\frac{\sin a}{1+\cos a}
\end{aligned}
$$

## Parent Functions

constant function
$f(x)=$ a graph is a horizontal line
identity function
$f(x)=x$ points on graph have coordinates $(a, a)$ quadratic function
$f(x)=x 2$ graph is U-shaped
cubic function
$f(x)=x 3$ graph is symmetric about the origin
square root function
$f(x)=\operatorname{sqrt}(x)$ graph is in first quadrant reciprocal function
$f(x)=1 / x$ graph has two branches
absolute value function
$f(x)=|x|$ graph is $V$-shaped

Exponential \& Logarithmic
Logarithmic
$y=\ln x$
Exponential
$y=b x$
Unit Circle

## Domain \& Range

Domain: The domain of a function is the set of all possible input values (often the "x" variable), which produce a valid output from a particular function. It is the set of all real numbers for which a function is mathematically defined.

Range: The range is the set of all possible output values (usually the variable $y$, or sometimes expressed as $f(x)$ ), which result from using a particular function.
