

### Rails

<code>rails server [-b \$IP -p \$PORT]</code>	start server
<code>rails generate scaffold <i>table</i> <i>column:type</i> ...</code>	
<code>rails [<i>version</i>] new <i>name</i></code>	create new rails app
<code>bundle install</code>	install gems in Gemfile. updates Gemfile.lock
<code>bundle exec <i>command</i></code>	run command with gems from Gemfile.lock
<code>bundle update</code>	update list of gems
<code>rails console</code>	opens up access to models

----- Rails Shortcuts -----

<code>rails server</code>	<code>rails s</code>
<code>rails console</code>	<code>rails c</code>
<code>rails generate</code>	<code>rails g</code>
<code>bundle install</code>	<code>bundle</code>
<code>rake test</code>	<code>rake</code>

`rails generate controller action ...`

`bundle - gem install bundler view`

### Git

<code>git push --set-upstream <i>remote</i> <i>branch</i></code>	link current branch to remote branch
<code>git push -u origin <i>branch</i></code>	create and link branch remotely
<code>git config [--global] user.name <i>name</i></code>	
<code>git config [--global] user.email <i>email</i></code>	
<code>git clone &lt;repo&gt; [&lt;dir&gt;]</code>	clone <repo> with <dir> name
<code>git revert &lt;commit&gt;</code>	
<code>git diff master...&lt;branch&gt;</code>	difference between <branch> and where <branch> diverged from master

### gem

`gem list gem`

### Ruby Version Manager (RVM)

`rvm use X`

X = version you want to use, such as 2.1.4

### Minitest

`ruby path/to/file.rb --name test_method_name`

Run one specific test

### Heroku

heroku version

heroku login

heroku keys:add

heroku create *[name]*

heroku open opens running app in browser

heroku rename *name*

heroku logs

git push heroku master rebuild/rerun app with latest code?

### Rake

rake -T [*namespace*] display all tasks [in namespace]

### Rubocop

rubocop --auto-gen-config

rubocop -a auto cleanup

### Active Record

ContentDefinition.where('display\_name NOT LIKE (?)', ['test%'])

Collection.delete\_all

### Work

lsof -wni tcp:9292 NS

lsof -wni tcp:7999 AUTH

lsof -wni tcp:8081 RLS

kill -9 *PID*
