Preflight Checklist

Before you fly, make sure you run through these checks.

Preflight Checks

*	Check weather conditions
*	Lens cover and gimbal lock removed
*	Check battery strength
*	Compass calibrated
*	Check remote signal strength
*	Check satellite strength
*	SD card in aircraft
*	Home port and Return to home set
*	Double check surroundings for obstacles (power lines, tall buildings, trees, etc).

Brought to you by Wesley Hall Digital

I have been an FAA Part 107 licensed drone pilot since 2015, and I provide private tutoring for drone pilots who want to earn their commercial license. I regularly attend art shows and vendor fairs to sell signed and numbered prints of my work. Follow me on Facebook, Instagram, or Twitter to find out where I will selling prints next, or contact me for more info.
