

Install

```
pip install plotly
```

Import

```
import plotly.express as px
```

Allgemeiner Code für Plot

```
fig = px.chart_type(  
df,  
chart_specification_parameters,  
title= " Chart title",  
labels ={"x_column_name":  
"X column name"},  
width=600,  
height =400,  
)  
fig.show()
```

(Beispieldatensatz: Iris)

```
df = px.data.iris()
```

Scatter Plot

```
fig = px.scatter(  
df, x='sepal_width',  
y='sepal_length',  
color='species',  
marginal_x='violin',  
marginal_y='box'  
)
```
