

Starfinder Ship Combat Sheet

Combat Phases

1. Engineering Phase (Captain, Engineer)

2. Helm Phase (Captain, Pilot, Science Officer)

3. Gunnery Phase (Captain, Gunner)

The Science Officer can act before or after the pilot in the Helm Phase (2).

Critical Damage (roll 1d10)

(0) Life Support

•Condition applies to all captain actions

(1-2) Sensors

•Condition applies to all science officer actions

(3-5) Weapons Array

•Randomly determine one arc containing weapons; condition applies to all gunner actions using weapons in that arc (a turret counts as being in all arcs)

(6-7) Engines

•Condition applies to all pilot actions

(8-9) Power Core

•Condition applies to all engineer actions except hold it together and patch; a malfunctioning or wrecked power core affects other crew members' actions (see page 321)

Outside Combat

Restoring Shields (Engineering DC15 + $\frac{3}{2} \times \text{Tier}$)

•Spend 1 minute to double the recharge rate of shields for 10 minutes

Repairing Damage (Safety, 5 hrs, 10 UPB/damage)

•Repairing hull damage must be done when the ship is completely stopped. It costs 10 UPBs per hull point restored and takes 5 hours total

Improve Repairs (Engineering DC15 + $\frac{3}{2} \times \text{Tier}$)

•Success cuts either time or cost in half; for each 10 points above the DC cut either time or cost in half (or in half again) to a minimum of 1 UPB per damage and 1 hour. Failure increases cost by 5 UPB per damage. Any number of allies may aid on this check.

Captain Actions

Demand (Intimidate DC15 + $\frac{3}{2} \times \text{Tier}$)

•Grant a +4 bonus to one specific check by succeeding. You must use this action before the associated check is rolled, and you can grant this bonus to an individual character only once per combat. You cannot make demands of yourself

Encourage (Diplomacy DC15 OR Same Skill DC10)

•Can encourage another member of the crew to give her a bonus to her action. This works like aid another (see page 133), granting a +2 bonus to the check required by a crew action.

Taunt (Push [Comms], Bluff or Intimidate DC15 + $\frac{3}{2} \times \text{Target Tier}$)

•Select an enemy vessel and phase and roll **Bluff** or **Intimidate**; if successful, each enemy character acting during the selected phase takes a 2 penalty to all checks for 1d4 rounds; the penalty increases to 4 if the enemy's check is made as part of a push action. Cannot target the same enemy twice in combat.

Orders (Level 6, Push, DC15 + $\frac{3}{2} \times \text{Tier}$, 1RP)

•Can grant an additional action to one member of the crew by spending 1 Resolve Point and succeeding at a related skill check at the above DC. **Computers** for science officer, **Engineering** for engineer, **gunnery** (see page 320) for gunner, and **Piloting** for pilot. Target gains another action if successful, but cannot take the same action twice. You cannot give yourself orders

Moving Speech (Level 12, Diplomacy DC20 + $\frac{3}{2} \times \text{Tier}$, 1RP)

•Use your action to give a moving speech to the crew during one phase of combat. For the remainder of that phase, your allies can roll twice and take the better result when performing crew actions.

Engineer Actions

Divert (Engineering DC10 + $\frac{3}{2} \times \text{Tier}$)

•Make engineering check to divert power. If engines, **speed** increases by 2 this round. If science, **science officers** get +2 to checks this round. If **weapons**, damage rolls of 1 become 2. If **shields**, restore an amount of Shield Points equal to 5% of the PCU rating of the starship's power core (see page 296), up to the shields' maximum value. Evenly distribute the restored Shield Points to all four quadrants (putting any excess Shield Points in the forward quadrant).

Hold it Together (Engineering DC15 + $\frac{3}{2} \times \text{Tier}$)

•Select one system; that system is treated as if its critical damage condition were two steps less severe for the rest of the round (wrecked becomes glitching, and a malfunctioning or glitching system functions as if it had taken no critical damage). This check isn't modified by penalties from critical damage to the power core.

Patch (Engineering DC Varies)

•Patch a system to reduce the effects of a critical damage condition. The number of actions and the DC of the Engineering check required to patch a system depend on how badly the system is damaged. The number of actions required can be reduced by 1 (to a minimum of 1 action) by increasing the DC by 5. **Glitching**: 1 action, DC10 + $\frac{3}{2} \times \text{Tier}$. **Malfunctioning**: 2 actions, DC15 + $\frac{3}{2} \times \text{Tier}$. **Wrecked**: 3 actions, DC20 + $\frac{3}{2} \times \text{Tier}$

Overpower (6 ranks Engineering, Push, DC15 + $\frac{3}{2} \times \text{Tier}$, 1RP)

•If successful, this functions as the divert action, but you can send extra power to any three systems listed in that action. This action and the divert action can't be taken in the same round.

Quick Fix (12 ranks Engineering, DC20 + $\frac{3}{2} \times \text{Tier}$, 1RP)

•If successful, remove the critical damage condition from one system for 1 hour (allowing it to function as if it had taken no critical damage), after which time it must be repaired as normal.

Gunner Actions

Fire at Will (Push)

•You can fire any two starship weapons, regardless of their arc. Each attack is made at a 4 penalty.

Shoot (1d20+BAB OR Piloting ranks+DEX+Bonuses+Range Penalty)

•You can fire one of your starship's weapons. If you use a turret weapon, you can target a ship in any arc.

Broadside (Level 6, Push, 1RP)

•Fire all of the starship weapons mounted in one arc (including turret-mounted weapons). Each weapon can target any vessel in that arc. All of these attacks are made with a 2 penalty.

Precise Targeting (Level 12, 1RP)

•Fire one weapon at one target. If it hits and enemy shield are depleted in that quadrant, you deal critical damage to a random system. If the attack would normally cause critical damage, the normal critical damage applies as well (meaning your attack could potentially deal critical damage multiple times; determine which system is damaged as normal each time).

Pilot Actions

Fly

- No skill check, regular movement

Maneuver (Piloting DC15 + $\frac{3}{2} \times \text{Tier}$)

- Move up to speed, reduce distance between turns by 1 (minimum 0).

Stunt (Piloting DC Varies)

- Back off (Piloting DC10 + $\frac{3}{2} \times \text{Tier}$)** Move half speed backwards without turns. If fail, move back 1 hex only. Fail by 5 or more, no movement and -4 to AC and TL.
- Barrel Roll (Piloting DC10 + $\frac{3}{2} \times \text{Tier}$, Large max size)** Move half speed and facings inverted 1 round. Fail, no roll. Fail by 5 or more, no roll, -4 AC and TL.
- Evade (Piloting DC10 + $\frac{3}{2} \times \text{Tier}$)** Move speed, +2 AC and TL. Fail, no bonus. Fail by 5 or more, still move but -2 AC and TL.
- Flip and Burn (Piloting DC15 + $\frac{3}{2} \times \text{Tier}$)** Move half speed and turn 180°. Fail, no rotation.
- Flyby (Piloting DC15 + $\frac{3}{2} \times \text{Tier}$)** Move normal, can move through enemy w/o provoking. During gunnery phase, choose one arc of ship to fire at enemy and treat as close range. If fail, gunnery phase is normal and movement provokes.
- Slide (Piloting DC10 + $\frac{3}{2} \times \text{Tier}$)** Move up to speed in forward-port or forward-starboard direction w/o changing facing. Fail, move forward half speed w/o turns.
- Turn in Place (No skill check)** Ship can face any direction, If **Clumsy**, -4 AC and TL. If **Poor**, -2AC and TL.

Full Power (Piloting 6 ranks, Push, 1RP)

- Move your starship up to 1-1/2 times its speed. Can make turns during this movement, but you add 2 to your starship's distance between turns.

Audacious Gambit (Piloting 12 ranks, DC20 + $\frac{3}{2} \times \text{Tier}$, 1RP)

- Move up to speed, treat turns distance as 2 lower (minimum 0), can move through enemies without provoking, and can face any direction at the end of the movement.

Science Officer Actions

Balance (Computers DC10 + $\frac{3}{2} \times \text{Tier}$)

- Can shift Shield Points (SP) from the shield in one quadrant another quadrant, including to depleted shields (after rebalancing, every shield must have at least 10% of the total current SP). Alternatively, you can add up the SP from all the remaining shields and evenly distribute them to all four quadrants, putting any excess SP in the forward quadrant.

Scan (Computers DC5 + $\frac{3}{2} \times \text{Target Tier}$ + Countermeasures)

- If you succeed at this check, you learn the first unknown piece of information on the following list. For every 5 by which you exceed the check, you learn another unknown piece of information. Subsequent checks reveal new pieces of information, continuing down this list.
 1. Basic Information: Living crew complement and ship classification, size, speed, and maneuverability.
 2. Defenses: AC, TL, total and current Hull Points, total and current Shield Points in each quadrant, and core PCU value.
 3. Weapon: Information about one weapon, including its firing arc and the damage it deals, starting with the weapon that uses the most PCU. Repeat this entry until all the starship's weapons are revealed.
 4. Load: Information about how the starship's expansion bays are allocated and any cargo the starship might be carrying.
 5. Other: Any remaining ship statistics.

Target System (Push, Computers DC5 + $\frac{3}{2} \times \text{Target Tier}$ + Countermeasures)

- If you succeed, choose one system (core, engines, life support, sensors, or weapons). The next attack made by your starship that hits the enemy ship scores a critical hit on a natural roll of 19 or 20. If that attack deals critical damage, it affects the chosen system. For any further critical damage resulting from the attack, determine which system is affected randomly as normal. Your starship's sensors can target only one system on a specific enemy starship at a time, though this action can be used to concurrently target systems on multiple starships.

Science Officer Actions (cont)

Lock On (Computers 6 ranks, Push, DC5 + $\frac{3}{2} \times \text{Target Tier}$ + Countermeasures, 1RP)

- If you succeed, your starship's gunners gain a +2 bonus to gunnery checks against the target for the rest of the round. This action can be taken only once per round.

Improve Countermeasures (Computers 12 ranks, DC5 + $\frac{3}{2} \times \text{Target Tier}$ + Countermeasures, 1RP)

- If you're successful, gunners aboard the target starship roll twice and take the worse result for gunnery checks during this round (including checks for tracking weapons).
