

Lattice Energy

The energy change when 1 mole of a solid compound is formed from its gaseous ions under standard conditions.

Entropy of a system

The measure of the disorder of a system

Standard enthalpy change of solution

The energy change when 1 mole of substance dissolves in water

Standard enthalpy change of hydration

Energy change when 1 mole of gaseous ions dissolve in water to form an infinitely dilute solution

Electron Affinity

The enthalpy change when 1 mole of electrons is gained by 1 mole of gaseous ions
