

Install and verify webservice

Webservice <https://chrome.google.com/webstore/detail/web-server-for-chrome/ofhbbkphhbklhfoeikjpcbhmlclogigb>

unsubscribe

you need to call unsubscribe() on a PushSubscription. Back in your script s/main.js file, change the pushButton click listener in initializeUI() to the following pushButton.addEventListener('click', function() { pushButton.disabled = true; if (isSubscribed) { unsubscribe(); } else { subscribeUser(); } });

Manual for the exercise

<https://codelabs.developers.google.com/codelabs/push-notifications/index.html#6>

Handle Push event

You need to listen for this event and show a notification as a result. Add the following code to your sw.js file:

```
self.addEventListener('push', function(event) {
  console.log('[Service Worker] Push Received.');
```

```
self.addEventListener('push', function(event) {
  console.log('[Service Worker] Push had this data: ', event.data.text());
  const title = 'Push Codelab';
  const options = {
    body: 'Yay it works.',
    icon: 'images/icon.png',
    badge: 'images/badge.png'
  };
  event.waitUntil(self.registration.notify(title, options));
});
```

```
self.addEventListener('push', function(event) {
  const title = 'Push Codelab';
  const options = {
    body: 'Yay it works.',
    icon: 'images/icon.png',
    badge: 'images/badge.png'
  };
  self.registration.showNotification(title, options);
});
```

Subscribe to User

Add this code to the main.js

```
function initializeUI() {
  pushButton.addEventListener('click', function() {
    pushButton.disabled = true;
    if (isSubscribed) {
      // TODO: Unsubscribe user
    } else {
      subscribeUser();
    }
  });
  // Set the initial subscription value
  registration.onpushsubscriptionchange(function(event) {
    isSubscribed = !event.subscripted === null;
    updateSubscriptionOnServer(event.subscripted);
    if (isSubscribed) {
      console.log('User is subscribed.');
```

```
    } else {
      console.log('User is NOT subscribed.');
```

```
    }
    updateBtn();
  });
}
```
